## How to Play

Determine how much each square is worth. See payout at the bottom  
Pass the board around to all participants and collect money.

## Drawing the numbers

Once the grid is full, you will then draw the numbers that will represent the last digit in each team's score. Cut out each number and place in a bowl or hat. Draw one at a time, writing the top row first (AFC), then re-draw for top to bottom (NFC).

## Who Wins

After the first quarter circle the winner and write a 1st next to it. To determine the winner look at the second number of the score.

After the second quarter circle the winner and write a 2nd next to it. And so on...
